Correction: Weight Science: Evaluating the evidence for a paradigm shift

Linda Bacon\textsuperscript{1,3}* and Lucy Aphramor\textsuperscript{1,2}

Correction

Erratum

Since publication of this article [1], it has come to our attention that there is an error in the section discussing assumptions about obesity-related costs. Table 2 is correct, indicating that 36% of the population is misidentified when BMI is considered, but there is a typographical error in the text which reported it as 31%.
